Workshops & trainings

Our corporate trainers operate on site for a workshop or a training on a theme defined in advance with you (e.g. : waste reduction, responsible consumption, etc.).

Our intervention ranges from a couple of hours to a full day depending on your context (number of people, objectives, etc.).

We take care to promote team cohesion and team building in order to address these topics in a playful and inspiring way.

Audit and adapted solutions

Your company wishes to develop or improve its environmental approach? Acting on waste management is one of the main and easiest lever you can pull.

The benefits are multiple :

- **Economical**: by limiting the amount of waste, their management costs decrease.
- **Ecological**: reducing consumption impacts positively on the planet.
- **Legal**: the prevention of waste is a government priority, therefore you work in this direction.

COSEDEC accompanies you toward this perspective in order to optimize your waste management system.
